PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in web development using HTML5, CSS3, JavaScript, JSP, Java, and MySQL. Skilled in developing responsive web applications, implementing CRUD operations, debugging, and database integration, with strong problem-solving skills and a commitment to quality. Seeking an entry-level Web Developer role to build user-focused web solutions.

TECHNICAL SKILLS

Programming Languages	Java, SQL
Java Technologies	Core Java, OOPs, Exception Handling, JDBC, JSP
Backend Technologies	Spring Boot, REST API concepts, Apache Tomcat
Web Technologies	HTML5, CSS3, JavaScript, BootStrap, Responsive Web Design
Database Technologies	MySQL, SQL Queries, PL/SQL, CRUD Operations, Database Design
Architecture	MVC Architecture, DAO Pattern, Layered Architecture
Tools	Eclipse, VS code, Git, GitHub, MySQL Workbench

PROJECTS

Savora | Restaurant Management System – [GitHub](#)

Technologies: Java | JDBC | MySQL | MVC Architecture | DAO Pattern | SQL

- Designed and developed a Java-based Restaurant Management System to automate menu management, order processing, billing, customer records, inventory tracking, and staff administration.
- Implemented a layered MVC architecture using Model, Controller, Service, and DAO layers to improve maintainability, modularity, and scalability.
- Integrated MySQL with JDBC and implemented CRUD operations using structured SQL queries and relational database design.
- Implemented role-based authentication and authorization workflows for administrators, managers, and staff users.
- Applied Object-Oriented Programming principles, exception handling, input validation, and debugging techniques to improve application reliability.

The Foundation School – [GitHub](#)

Technologies: Java | JSP | HTML5 | CSS3 | MySQL

- Developed a Java-based web application using JSP, HTML, CSS, and MySQL with structured navigation and reusable user-interface components.
- Implemented server-side functionality and relational database integration for managing application workflows.
- Created responsive pages and reusable frontend components to improve application consistency and usability.
- Debugged frontend and backend issues to improve application reliability and user experience.

Food Cave | Food Pre-Ordering System – [GitHub](#)

Technologies: HTML5 | CSS3 | JavaScript | PHP | MySQL

- Developed a responsive food pre-ordering application with user authentication, menu management, cart operations, and order-processing features.
- Designed relational MySQL database tables and implemented CRUD operations for users, food items, carts, and orders.
- Built responsive user interfaces using HTML, CSS, and JavaScript for desktop and mobile users.
- Integrated frontend forms with backend processing and database operations.

Integrated Framework for Predicting Financial Behavior Using Deep Learning – [GitHub](#)

Technologies: Python | TensorFlow | Keras | Machine Learning

- Developed a deep learning-based prediction system to analyze and identify financial behavior patterns.
- Performed data preprocessing, feature engineering, model training, testing, and evaluation using Python-based machine-learning libraries.
- Applied TensorFlow and Keras to design, train, and evaluate predictive models.
- Improved model performance through iterative experimentation, parameter adjustment, and result analysis.

EDUCATION

Bachelor of Technology in Computer Science and Engineering	2021 – 2025
Vignan Institute of Technology and Science	

Intermediate Education (XII)	2019 – 2021
Narayana Junior College, TSBIE	

Secondary Education (X)	2018 – 2019
Santhi Nikethan High School, TSBSE	

CERTIFICATIONS

- Full-Stack Java Development – Simplilearn SkillUp
- Structured Query Language (SQL) – HackerRank
- JavaScript Essentials 1 (JSE) – Cisco
- Programming Essentials in Python (PSAP) – Cisco

LEADERSHIP ACTIVITIES

- Organising Committee Member – VANSI 2K24 and VANSI 2K25.
- Member – Computer Society of India Student Chapter.
- Gained hands-on experience in a workshop on AI and ChatGPT applications.
